THE SAFEST RAISED DESIGN FLOOR!

EXHIBITIONS • RETAIL • INTERIOR • EVENTS • DISPLAYS • DECORATIONS

A UNIQUE LEVELING DESIGN FLOOR

The floor system combines all the facets of a modern floor covering with safety and easy installation. These times require sustainable use of materials, which can be recycled, and where partial use (rental) is possible. There are no compromises on quality and design! The weight and volume are limited, so that transport costs and CO2 consumption are minimized.

The Basics of the system is a combination of recyclable ABS injected tiles with with a printed polycarbonate cover panel, (scratch-resistant) or a transparent cover panel (frost). In addition there are several edge finishing, including a sloping ramp and aluminum profiles.

The floor system was developed for the installation of temporary spaces, such as exhibitions, events and showrooms. In addition to these mobile floors there are many applications where the top covers needs to be regular replaced by new designs and Ads, such as in retail, shop in shop, museums, interiors and shop windows. The stand-ON floor can be changed within minutes, saving your time and effort. In a few hours the shops are changed with our new floors of marble, wood, granite, steel. Ofcourse you can design your own ideas. We make it!

Safety!

- The electrical cables are hidden at the top.
- Thanks to the light tiles NO back problems.
- Minimum entry height, nobody stumbles.
- The tiles does not sink and can be heavy load (cars and machines!)
- Fire retardant and non-slip.

Easy installation!

- It can be configured by 1 person.
- No tools required.
- Stackable tiles.
- The tabs are clicked together from above.

Design!

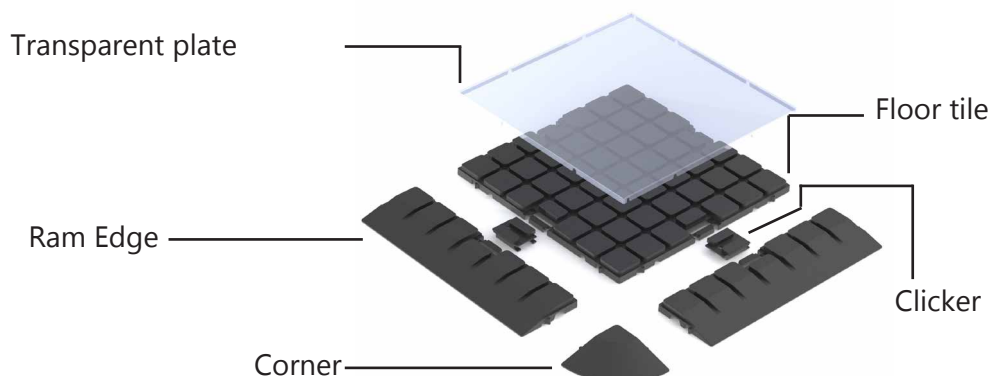

- 22 unique basic designs.
- Scratch-resistant for intensive use.
- Basic tiles also combine with classic carpets (tiles) or with other coverings.

Guarantees!

- 5 years on the print quality.
- Cradle to cradle with take back guarantee.
- 10 years on technical operation.

Use!

- Exhibition stands
- Events
- Showrooms
- Retail
- Shop in Shop
- Interior
- Decorations (retail window)

3-YEARS RENTAL

With the Stand-ON raised floor of 25m² you have a basic set that will surprise your customer at many trade fairs and events. The complete content is supplied in a sturdy container on wheels and is supplied with one of our 22 Design cover plates. In addition, you can finish the floor all around with sloping ramps or a sleek aluminium profile.

Use the set as often as possible, if a part is damaged you will get it delivered free of charge. You rent the set for 3 years with a full warranty, after the rental period we will get the set return, it will be recycled and new Stand-On floors will be made out of it. The cover plates are printed en protect with a 6 layers coating. Because of this coatings we can guarantee you a scratch free use and a easy cleaning, even with polishing detergent.

BENEFITS

- Lightweight raised floor
- Easily placed without tools
- In ABS or in ABS V0 = Fire-retardant, self-extinguishing, and certified
- Connect on top side and selfsupporting
- Electrical cables or led strips can be embedded both on the bottom and the top
- Stack tiles into each other (Lego principle, nestable)
- Can take heavily loads, 900 kg per tile, tiles do not bend
- Tiles 500 x 500 mm, for indoor and outdoor use
- Sustainable, Cradle to Cradle
- Can be expanded modularly
- Cheap and low depreciation
- Safe = Non-slip, no sharp edges, always flat
- Choose from our collection of 22 Designs
- Transparent cover plate
- Cover plate can be printed in every colour or full-colour
- Stacking cover plates alternately, two plates fit into each other
- Exchangeable photo prints
- Compact to transport
- A new look on every fair
- Can be combined with upholstery or floor tiles
- Finishing edges and finishing corners with cable duct in same colour as tiles
- Easy to clean
- Lifetime warranty
- Dutch Design and produced in the Netherlands.
- PCT/NL2018/050683

HOW DOES THE SYSTEM WORKS?

EASY TO INSTALL WITHOUT TOOLS AND COMPACT FOR TRANSPORT AND STORAGE

Place the tiles together and attach them with the connector. The tiles have now become self-supporting, so the appearance is always sleek and beautiful, even with uneven floors!

TRANSPORTATION

The basic tiles are stackable. Just like a lego brick, the tiles are stacked. The tiles take up minimal space which ensures compact transport. It also prevents the tiles from sliding.

FINISH

With the stand-on floor, you have unprecedented possibilities. Basically you can use the Stand-ON floor as a raised floor and cover it with standard carpet tiles, laminate wood or any other material, edging with aluminium profiles or sloping tiles. But with our cover plates, you can design a complete new look and feel. These cover plates are available in transparent frost and with printed designs.

SWITCH PRINTS

The clear ones are designed to put a thin printed sheet under the plate. Now the print is visual from above and you can change them at any time. Thanks to the strong cover plates of the Stand-ON system, your print remains protected and therefore reusable. This is the affordable way of making exciting floors. We call it flexible expression that generates more visitors, more leads and more profit.

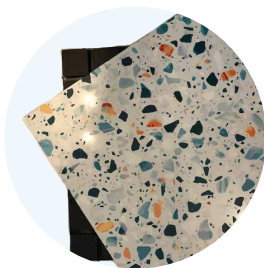

GUARANTEES

The with printed designs, (printed with UV ink, and protected with a strong uv coating) is the new way to design the perfect floor. Print Marble, Stone, Wood, Carpet, Metal, Leather, Concrete or any other desired material, for sure it is nicer, lighter, more durable and easier to clean! It looks better than the original! WITH 5 YEARS OF WARRANTY!
